

*-Carbon Reduction Plan

Supplier name

The Dextrous Web Ltd. trading as dxw

Publication date

September 2025

Commitment to achieving net zero

dxw is committed to achieving net zero emissions by 2050.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.

Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2021-2022

Additional details relating to the baseline emissions calculations:

01/09/2021-31/08/2022 with 83 full-time employees

Baseline year emissions:

Emissions	Total (tCO ₂ e)
Scope 1	1.88
Scope 2	10.36
Scope 3 (included sources)	248.42
Total emissions	260.66

Current emissions reporting

Reporting year: 2023-2024

Emissions	TOTAL (tCO ₂ e)
Scope 1	1.384
Scope 2	0.655
Scope 3 (see below)	228.571
Total emissions	230.61

Scope 3 emissions breakdown for 2023-24.

Our [carbon report](#) details the methodology used for each part of our Scope 3 calculations.

Scope 3 category	Total emissions (tonnes CO2e)
1. Purchased goods and services: in Expenses ¹	146.308
2. Capital goods	5.55
3. Fuel- and energy-related activities (not included in scope 1 or scope 2): Water	0.107
3. Fuel- and energy-related activities (not included in scope 1 or scope 2): Work from home	56.503
3. Fuel- and energy-related activities (not included in scope 1 or scope 2): Well-to-tank	1.801
3. Fuel- and energy-related activities (not included in scope 1 or scope 2): Web hosting	0.104
3. Fuel- and energy-related activities (not included in scope 1 or scope 2): Transmission and distribution	0.618
4. Upstream transportation and distribution²	n/a
5. Waste generated in operations	8.21
6. Business travel	3.38
7. Employee Commuting	5.98
8. Upstream leased assets	n/a
9. Downstream transportation and distribution³	n/a
10. Processing of sold products	n/a
11. Use of sold products	n/a
12. End-of-life treatment of sold products	n/a
13. Downstream leased assets	n/a

14. Franchises	n/a
15. Investments	n/a

¹ We have included in this number the estimated carbon impact of all purchased goods and services that are not attributable to other scope 3 activities.

² dxw has no quantifiable upstream transportation or distribution. For transportation of purchased goods and services, we have included GHG emissions in this category based on available UK government published conversion figures.

³ dxw creates digital goods only, so we have no downstream transportation and distribution.

Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 172 tCO₂e by 2030. This is a reduction of 25%, based on the company size being comparable to 2025.

Carbon reduction projects

Completed carbon reduction initiatives

The following environmental management measures and projects have been completed or implemented since the 2021/2 baseline. The carbon emission reduction achieved by these schemes equate to 30 tCO₂e, a 11.5% reduction against the 2021/2 baseline and the measures will be in effect when performing the contract.

The greatest reduction here is from our AWS hosting, where Amazon now provides a carbon dashboard with emission numbers. During this period they transitioned to mostly green energy. dxw also closed an office. Implementation of an EV scheme for staff, and the bolstering of the Earth team, with a remit to create an environmental management system and have this certified to ISO 14001.

Future carbon reduction initiatives

In the future we hope to implement further measures such as: Encouraging staff to use green energy when working from home, reducing the use of polluting transport, and getting the work done by our Earth team certified to ISO 14001 in Q1 2026.

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standards for Carbon Reduction Plans.

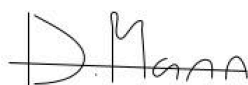

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol

corporate standard¹³ and uses the appropriate government emission conversion factors for greenhouse gas company reporting.¹⁴

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.¹⁵

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the supplier:

D Mann

CEO dxw
