

# Taking payments via GOV.UK Pay

18-10-2018

helping local government  
teams unlock the benefits  
of common platforms and  
components

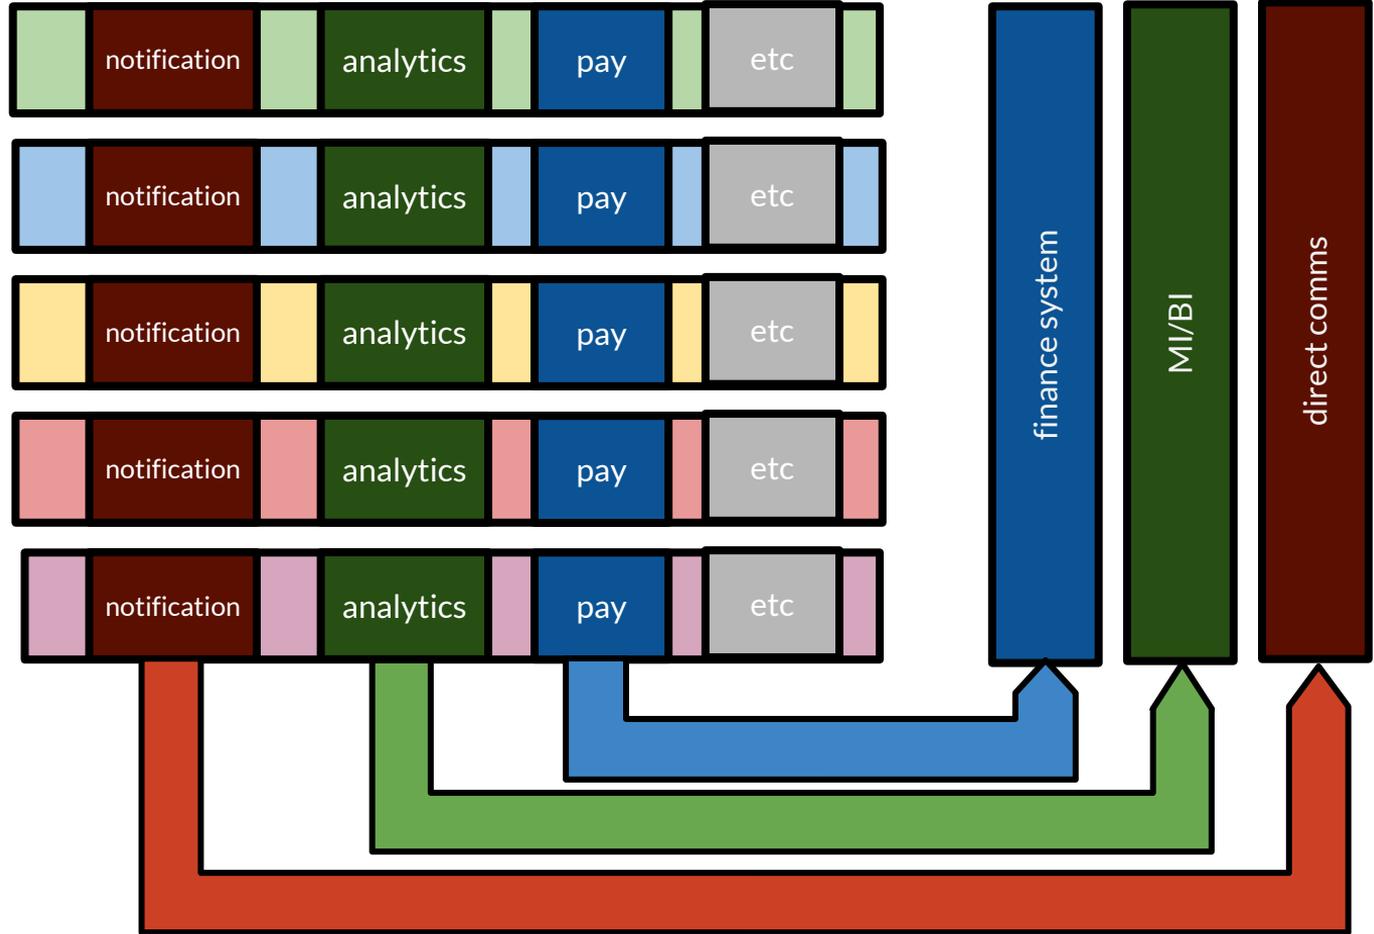

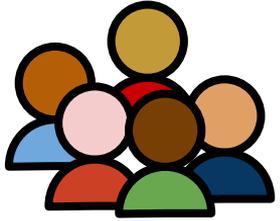

Each service is distinct and has its own integration into back-end systems

## Single service applications create

- inconsistent user experience
- friction to change
- manually intensive integration
- business process integration complexity

## Local Government as a Platform promises

- separation of interface from process
- lower cost of change
- moving the integration out of the vendors
- more opportunity for component and data re-use

Getting to there is hard.

- slow/expensive support contracts
- legacy systems with limited APIs
- data cleanliness and mapping
- lack of standards for data exchange
- some business cases are harder to make

# Integrating with GOV.UK Pay

an example

Number of Penalty Charge  
Notices per year in a city  
**129,000**

Cost per transaction on  
phone/online

£2.83 / 30p

Cost saving by going online  
£326,000

Cost saving by going online

~~£326,000~~

£3,260

Adoption rate increase  
(with modern payment  
process)

1% to 70%

Cost saving from a modern  
online payment gateway

£228,000

# Cost per transaction on GOV.UK Pay

??p

multiply this by all the other  
services taking payments...

# Front-end integration
